

L340 Mega Clown Plecostomus

Call for Price: 011 826 5887

Description

The Mega Clown Plecostomus is an ornate pleco highly desired for its gorgeous markings. In contrast to its larger-growing cousins, the relatively compact size of this beautiful pleco makes care more manageable for hobbyists. The Mega Clown Plecostomus sports a visually-striking pattern created by a convoluted network of intense stripes upon a dark, black-brown body color. The irregular markings and sharp color contrast creates a "ripple" pattern for a hypnotic, other-worldly beauty sure to entrance pleco enthusiasts and hobbyist alike.
