

Large Albino Gibbicep Sailfin Plecostomus

Call for Price: 011 826 5887

Description

The Albino Gibbicep Sailfin Plecostomus (*Pterygoplichthys gibbiceps*) is a beautiful albino variation of the popular sailfin pleco, known for its light cream coloration and impressive dorsal fin. Native to the Amazon River basin in South America.

Origin: Amazon River Basin, South America

Diet: Omnivorous – enjoys algae wafers, sinking pellets, blanched vegetables (zucchini, cucumber), and occasional protein-based treats like bloodworms.
