Availability: 9

Price: R70.00

Short Description
Bacter Kit Soil is a kit to seed an aquarium soil.

Description
BacterKit Soil informations

BacterKit Soil combines 2 different products for fresh aquarium aquarium:

Bacter Soil: strains of live bacteria specifically aimed at colonizing a freshwater aquarium soil.

Soil nutrients: Nutrients necessary for the proper development of bacteria in the soil

Natural an living bacteria of BacterKit Soil will help to install an optimal biological

filtration in the soil. It can be combined with Start Up which will install the biological filtration in the aquarium water.
