

Redline Torpedo Barb / Denison Barb

Call for Price: 011 826 5887

Description

The Redline Torpedo Barb (*Sahyadria denisonii*), also known as the Denison Barb or Roseline Shark, is a captivating freshwater fish renowned for its vibrant coloration and active schooling behavior. Native to the fast-flowing hill streams of the Western Ghats in India, this species adds dynamic movement and striking beauty to any large community aquarium.

- Scientific Name: *Sahyadria denisonii*
- Common Names: Redline Torpedo Barb, Denison Barb, Roseline Shark, Miss Kerala
- Primary Diet: High-quality sinking pellets or flakes
- Supplements: Live or frozen foods such as bloodworms, daphnia, and brine shrimp

Endemic to the Western Ghats of India, particularly the rivers and streams of Kerala and South Karnataka, the Redline Torpedo Barb inhabits clear, oxygen-rich waters.
