

Rosy Barb

Call for Price: 011 826 5887

Description

The Rosy Barb (*Pethia conchonius*) is a popular, hardy, and active freshwater fish that brings a burst of color to community aquariums. Its metallic pink to red hue becomes more vivid during mating or when kept in small groups. Ideal for beginners, this peaceful barb is easy to care for and thrives in well-maintained tanks.

-Scientific Name:*Pethia conchonius*

-Common Name:Rosy Barb

-Schooling Fish: Best kept in groups of 4/5 or more

- Omnivorous: Enjoys flakes, pellets, and freeze-dried foods

- Live/Frozen Foods: Bloodworms, brine shrimp, and daphnia

The Rosy Barb is native to rivers and streams of South Asia, especially in Bangladesh, northern India, and Nepal.
