Short Description
Green food for smaller herbivorous cichlids

Description
sera Granugreen is the staple food consisting of carefully manufactured granules for smaller cichlids that mainly eat plants and periphyton. This includes many of the East African cichlid species.

High quality herbal components such as Spirulina algae and spinach with a high percentage of natural carotenoids support optimal color development. The balanced composition supports strong development and healthy digestion. The slowly sinking granules keep their shape very well and do not pollute the water.

Ingredients
fish meal, corn starch, wheat gluten, wheat flour, wheat germ, brewers yeast, fish oil (containing 49% omega fatty acids), parsley, spirulina (1.7%), stinging nettle, herbs, alfalfa, mannan oligosaccharides (0.4%), sea algae, paprika, spinach, carrots, green-lipped mussel, Haematococcus algae, garlic.

Analytical constituents
Crude Protein 38.9%, Crude Fat 6.5%, Crude Fiber 4.6%, Moisture 5.0%, Crude Ash

5.3%.

Additives

Vitamins and provitamins: Vit. A 30,000 IU/kg, Vit. D3 1,500 IU/kg, Vit. E (D, L-?-tocopheryl acetate) 60 mg/kg, Vit. B1 30 mg/kg, Vit. B2 90 mg/kg, stab. Vit. C (L-ascorbyl monophosphate) 550 mg/kg.
