Price: R168.00

Description
Ista Snail Trap

The Ista Snail Trap offers an effective and environmentally friendly way to manage and reduce excessive snail populations in freshwater aquariums. Overpopulation of snails can become a common issue, especially in planted tanks, where they multiply rapidly and may damage plants or compete with other inhabitants for food. The Ista Snail Trap helps restore balance without the use of harsh chemicals or medications that could harm fish, shrimp, or plants.

Using a natural baiting method, the trap lures snails to it. Ista’s Snail Trap includes snail food which can be used as bait, drawing snails directly to the trap.
