Description

Fast dissolving Tetra AquaSafe turns tap water immediately into fish safe nature-like aquarium water. The new formula promotes healthy water and healthy fish through a unique mix of vitamins, natural biopolymers as well as trace elements.

Makes tap water safe for fish

Neutralises harmful substances for nature-like aquarium water

Substances in the tap water which are harmful to fish are immediately neutralized: Chlorine and Chloramine are eliminated and heavy metals like copper, zinc and lead are bound completely by a complexing agent

Promotes clear and healthy water

Contains bio colloids for beneficial bacteria growth which supports the creation of clear water
