

Tiger Barb

Call for Price: 011 826 5887

Description

The Tiger Barb(*Puntigrus tetrazona*) is one of the most popular tropical fish. This is due to its vibrant colors, playful behavior, and hardiness. Recognized by its distinctive black vertical stripes and orange fins, the Tiger Barb adds energy and contrast to any freshwater tank.

- Scientific Name:*Puntigrus tetrazona*
- Common Names:Tiger Barb
- Best Kept:In active schools
- Omnivorous: Will thrive on high-quality flake or pellet foods
- Supplements:Bloodworms, daphnia and brine shrimp.

Originally found in streams and swamps in Indonesia, Borneo, and Sumatra, the Tiger Barb thrives in well-oxygenated, tanks.
