

White Crowntail Betta

Call for Price: 011 826 5887

Description

The White Crowntail Betta is an eye-catching freshwater fish known for its dramatic, spiky fin rays and pure, elegant coloration. The crowntail's unique fin structure gives it a regal, flowing appearance that stands out in any aquarium. With its crisp white body and fins, this betta offers a minimalist yet striking look, ideal for aquascaped or themed tanks.

While they can survive without heaters, maintaining consistent warmth—especially during South African winters—is vital for their health and activity.

Bettas are carnivorous and enjoy a protein-rich diet. Feed them quality betta pellets, frozen or live foods like bloodworms and brine shrimp. Enhancing their meals with supplements such as garlic guard and Azoo Betta or Discus vitamins helps improve immunity, colour, and overall vitality.
