Sun Sun Internal Filter HJ611B

Availability: 10

Price: R220.00

Short Description
450L/H

Description
The SunSun HJ-611B Aquarium Internal Filter is a combination aquarium filter and aquarium pump in one.

The capacity of the HJ611B Sun Sun Internal Filter is 450 liters per hour with a power consumption of only 6 watts. The aquarium pump, which can be regulated by a sliding valve, has a rotary outlet nozzle with diffuser.

The Sun Sun HJ611B interal filter is designed for smaller aquariums from 25 to 60 liter volume (fitted with water flow control).

The Sun Sun HJ611B features an effective motor driven sponge filter for mechanical and biological filtration and is fully submersible.

The HJ611B can be fitted with a venturi system to inject air bubbles into the aquarium or use the spray bar for even more effective oxygenation and water movement.

Power: 6W

H-max: 0.9m

Output: 450L/H
