Dimensions: 66x61x114mm

The Sun Sun JVP wave makers can rotate 360 degree. High quality magnet to help eliminate "dead spots" in your aquarium.This is very important to the corals in your tank, as the waste they produce, during respiration needs to be carried away from the tissue, to your filtration system. High efficiency, energy-saving and long service lifetime. Suitable for saltwater and freshwater aquariums.

Maximum glass thickness for the magnet mounting: 10mm.

By utilizing the slide controller on the output nozzle, the output flow can easily be adjusted from a narrow to wide angle spread.
