Compatible with freshwater and marine aquariums.

500L/H - 4000L/H

Simulate the natural water circulation of the ocean, for coral & fish, with this wave maker pump featuring an easy to use control panel. With flow controller and 3 different wave setting modes, you get to choose the right setting for your aquarium at the right time, there’s even a night mode to reduce intensity. Compatible with marine and freshwater tanks for tropical fish, you can now add the motion of the ocean and their tropical environment to the aquarium. This pump offers low consumption and attaches to the aquarium via magnets.

High durability: the water pump is made of high-quality abs material, which is durable and has a long service life.

Not only does this wave maker pump offer a natural water circulation, but it also comes with a flow controller, allowing you to customize the water flow according to your

preferences.
