Super silent

Energy Efficient

Adjustable flow rate

Memory function to retain settings at restart.

Suitable for freshwater and marine aquariums.

Not only is this pump super silent, but it is also energy efficient, saving you money on electricity bills. Its durable design with ceramic internals guarantees wear-resistance and

silent operation.

The 10-minute pause feed mode function allows you to conveniently feed your pets without disrupting the water flow. This pump is designed for both freshwater and marine aquariums, ensuring versatility and compatibility with any setup.
