Resun LP-200 Air Pump 230W

Availability: 2

Price: R5,379.00

Description
Model: LP-200

The LP200 Air Pump quietly delivers a maximum high volume air output of 250 litres per minute, which is suitable for large fish and koi ponds as well as hydroponic systems.

It should be housed in a low dust environment.

Only place the pump outside the water in a dry environment, not in the water.

Must be set-up above the water level.

Power: 230 watts

Flow Rate: 250L/min

Adding oxygen or aeration into a fish pond /fish tank is very important for fish health, particularly in densely stocked fish ponds and in the summer months when oxygen levels decline. Fish will become visibly more active in an oxygen-rich pond.

NOTE - Ensure that one uses a Non Return Value to prevent the back flow of water to the air pump
