Air Hose Clamp/Airline Clamp Grey

Availability: 20

Price: R13.00

Short Description
Grey plastic G-clamp for adjusting airflow through aquarium airline tubing. Sold per individual unit.

Description
This grey aquarium airline clamp adjusts airflow by restricting the air hose. Its screw-operated G-clamp design provides a way to make flow adjustments without inserting an inline valve.

Product details

- **Type:** airline flow-control G-clamp.
- **Colour:** grey.
- **Material:** plastic.
- **Quantity:** one clamp, sold individually.

How it adjusts airflow

Position the clamp over compatible air tubing and turn the adjustment screw clockwise to restrict airflow. Check your air pump's guidance before restricting its output and confirm that the clamp is suitable for your tubing.

This is a flow-adjustment clamp, not a one-way non-return valve.

Ask Wazeer's Aquariums for help choosing the right airline controls for your setup.
