Seachem Discus Buffer 250g

Availability: 2

Price: R265.00

Description

Seachem Discus Buffer helps to replicate the ideal Discus environment (low pH & low GH (General Hardness)). Seachem Discus Buffer will lower pH and keep it lowered. Seachem Discus Buffer also softens water by precipitating calcium and magnesium. Use Seachem Discus Trace to restore the proper level of trace elements & Azoo Discus Vitamins for healthy Discus.

Seachem Neutral Regulator & Seachem Discus Buffer can be used in combination to achieve a desired pH when performing water changes or adding top off water.
