Description

Activated Carbon

Activated Carbon It is also known as activated charcoal, it is an essential filter media for every aquarium. It can effectively eliminate odors, detoxifies harmful metals, purifies and helps remove colorants from the water column. First, rinse the activated carbon with water, before using. Replace after 3 months.

FEATURES:

- Effectively eliminate odors.
- Detoxifies harmful metals.
- Purifies water and helps remove colorants from water.

Safe and Effective:

Manufactured from high-quality activated carbon, these pellets are safe and highly

effective, promoting a toxin-free environment for aquatic creatures and supporting a balanced ecosystem.

The activated carbon pellets efficiently adsorb impurities, chemicals, and contaminants, enhancing water quality by removing dissolved organic compounds and pollutants.
