Seachem Safe 1kg

Availability: 2

Price: R1,225.00

Short Description
Removes chlorine, chloramine, and ammonia Detoxifies nitrite and nitrate Highly concentrated Marine and freshwater 1kg

Description
Seachem Safe is the complete and concentrated dry conditioner for both fresh and salt water. Seachem Safe removes chlorine, chloramine and ammonia. Seachem Safe converts ammonia into a safe, non-toxic form that is readily removed by the tank's biofilter. Seachem Safe may be used during tank cycling to alleviate ammonia/nitrite toxicity. Seachem Safe detoxifies nitrite and nitrate, allowing the biofilter to more efficiently remove them. Seachem Safe is non-acidic and will not impact pH. Seachem Safe will not overactivate skimmers. Use at start-up and whenever adding or replacing water.

Use 1.25 g (1/4 tsp.) for every 1,250 L (300 US gallons) as needed to reduce chlorine and chloramine or use 1.25 g (1/4 tsp.) for every 300 L (75 US gallons) for ammonia. For precise dosing, use the Seachem Digital Spoon Scale.

Wazeer's Aquariums recommends using Seachem Safe to treat water without fish present, as it reduces the risk of overdosing. Ensure proper dosage for safe and effective results.
