Seachem AmGuard 100ml

Availability: 2

Price: R153.00

Short Description
Detoxifies Ammonia for up to 48 hours Ideal for emergency situations More effective than any other ammonia-binding product Most concentrated product on the market. 100ml

Description
Seachem AmGuard safely, rapidly and ef?ciently removes toxic free ammonia. It is safe to use during tank cycling and is ideal for treating emergency situations. Seachem AmGuard is the strongest liquid ammonia binder on the market. It works within minutes to detoxify free ammonia, and it doesn’t degrade for nearly forty-eight hours. That’s nearly twice as long as our competitors’ products. Unlike competing products, Seachem AmGuard converts it into a safe, non-toxic form that is readily removed by the tank’s biofilter. It does not alter pH. Ammonia can exist in two forms: free and ionized. It is only the free form that is toxic. Traditional ammonia test kits convert all ammonia to free ammonia by raising pH to 12–14; at this pH Seachem AmGuard cannot function and thus a false positive reading will result. For long term ammonia control, use Seachem Stability and Seachem Matrix. Use Ammonia Alert or MultiTest: Free & Total Ammonia to directly monitor levels of free ammonia. Seachem AmGuard also removes chlorine and chloramines.

Directions

Use 1 capful (5 mL) for every 200 L (50 US gallons) daily or as needed to reduce ammonia.

ADVANCED: If you have an Ammonia Alert that is reading “Alert”, then use 1 capful (5 mL) for every 400 L (100 gallons) daily. If it reads “Alarm”, then use 1 capful for every 200 L (50 gallons) daily. If it reads “Toxic”, then use 1 capful for every 80 L (20 gallons) daily.

Size- 100ml
