Seachem Neutral Regulator 250g

Availability: 2

Price: R265.00

Short Description

Adjusts pH to neutral (pH 7.0) from either a low or high pH Softens water by precipitating calcium and magnesium Removes chlorine, chloramine, or ammonia. 250g

Description

Seachem Neutral Regulator adjusts pH to neutral (pH 7.0) from either a low or high pH and maintains it there. It softens water by precipitating calcium and magnesium while removing any chlorine, chloramine, and detoxifying ammonia. The use of Seachem Neutral Regulator makes other conditioning unnecessary. To lower pH below 7.0 use Seachem Neutral Regulator with Seachem Acid Regulator (or Seachem Discus Buffer). To raise pH above 7.0 use with Seachem Alkaline Regulator. All of these products will enhance and stabilize the freshwater aquarium environment.

Size- 250g
