Chihiros Aquarium Cooling Fan

Availability: 2

Price: R983.00

Description

Chihiros is a high-performance aquarium fan. It is an effective cooling solution for freshwater and marine aquariums with a surface area of up to 60 cm. This compact fan efficiently reduces the water temperature by directing it towards the water surface, thereby accelerating evaporation.

The device is conveniently controlled via Bluetooth using the “My Chihiros” app. Equipped with a temperature probe and a humidity sensor, the fan provides precise data on the water temperature and ambient conditions, allowing the air speed to be adjusted precisely.

The Chihiros Cooling Fan Bluetooth is attached to the edge of the aquarium and is designed for a temperature reduction of 2 to 4°C.

Fan for cooling aquariums up to 60 cm.

Equipped with room and water sensors.

Controllable via ‘My Chihiros’ APP.

Simple mounting with a clamp bracket.

Splash-proof to IP55.

No mains plug included.
