Description

The Small Albino Tinfoil Barb (*Barbonymus schwanenfeldii*) is a striking and energetic fish that adds vivid motion and color to any freshwater aquarium. Known for its shimmering silvery-white body and bold red-orange fins, this albino variant is a great addition to compatible tanks.

- Scientific Name: *Barbonymus schwanenfeldii* (Albino variant)
- Common Name: Albino Tinfoil Barb
- Best Kept: In groups of 4/5 or more for social behavior
- Omnivorous: Eats flakes, pellets, algae wafers

Originally from Southeast Asia, including Thailand, Malaysia, and Indonesia. Naturally found in rivers, streams, and floodplains.
