Availability: 1

Price: R438.00

Short Description

Vitamin and amino acid supplement Enhanced with Vitamin C for marine fish Helps prevent diseases due to deficiency likelateral line disease. 250ml

Description

Seachem Vitality is a comprehensive vitamin, amino acid, and trace element supplement developed to address nutritional requirements commonly associated with long term closed system housing of marine ornamental fish. Seachem Vitality contains ascorbic acid in a heavy base of spirulina and chlorella. Ascorbic acid is a cofactor in the hydroxylation of proline and lysine to components of procollagen, the precursor of collagen, necessary for the formation of connective tissues, scar tissue in wound repair, and bone matrix. Both spirulina and chlorella contain a rich assortment of amino acids and vitamins. Seachem Vitality can be used on freshwater ornamental fish; however, it is specifically designed for marine fish.

Size - 250ml
