Description

The Large Albino Tinfoil Barb is a striking freshwater fish known for its shimmering white-gold body and vivid red fins. A variant of the classic Tinfoil Barb (Barbonymus schwanenfeldii), this albino form grows large, swims actively, and adds brightness to any large tank. Albino Tinfoil Barbs are hardy and social fish that thrive in schools. Their peaceful nature and dazzling appearance make them ideal for both beginners and seasoned aquarists with the right setup.

Scientific Name: Barbonymus schwanenfeldii(Albino)

Common Name: Albino Tinfoil Barb

Adult Size: Up to 35 cm (14 inches)

Albino Tinfoil Barbs are omnivorousand not picky eaters. Their diet can include:

- High-quality flakes or pellets

- Blanched vegetables (spinach, zucchini)

- Bloodworms, brine shrimp (live or frozen)

- Algae wafers

A varied diet ensures strong growth and vivid color.
