Description

The Large Tinfoil Barb is a popular and stunning fish species often seen in aquariums. Known for its silvery body and vibrant fins, this fish adds a touch of beauty and elegance to any tank.

- Scientific Name: Barbonymus schwanenfeldii

-Size: Can grow up to 12 inches (30 cm) or more in length

The Large Tinfoil Barb is omnivorous. It enjoys a varied diet, including:

- High-quality pellets

- Frozen or live food such as bloodworms and brine shrimp

The Large Tinfoil Barb is native to Southeast Asia, specifically found in rivers and lakes of Thailand, Myanmar, Cambodia, and Laos. They prefer warm, fast-moving waters but are adaptable to aquarium environments with proper filtration.
