Seachem Flourish 250ml

Availability: 2

Price: R241.00

Short Description
Comprehensive supplement for the planted aquarium Provides micro elements, trace elements and other nutrients Does not contain significant levels of nitrogen or phosphorus. 250ml

Description
Seachem Flourish is a comprehensive plant supplement for the natural freshwater aquarium. It contains a rich assortment of important micro elements, trace elements and other nutrients. These include calcium, magnesium, iron and other important elements that have been shown to be beneficial to aquatic plants. For macro element (NPK) fertilization, use Seachem Flourish Nitrogen, Seachem Flourish Phosphorus or Seachem Flourish Potassium as needed. Seachem Flourish is safe for invertebrates such as shrimp.

Seachem Flourish is designed to be used in conjunction with other macro and micro-nutrient supplements. Other manufacturers try to include ALL necessary nutrients, leading to overdoses of micro-nutrients in an attempt to raise macro-nutrient levels.
