Seachem Flourish Phosphorus 500ml

Availability: 2

Price: R381.00

Short Description
Phosphorus supplement for the planted aquarium A safe 4500 mg/L solution of potassium phosphate Takes the guesswork out of phosphate dosing.

Description
Phosphorus is one of the main three macro nutrients (nitrogen, phosphorous, potassium: NPK) required by plants and can often become the limiting factor to growth in a ?ourishing system. Seachem Flourish Phosphorus is a safe solution (4,500 mg/L phosphate) of potassium phosphate that takes the guess work out of phosphate dosing. Unlike competing products that mix nitrate and phosphate in a fixed ratio, Seachem Flourish Phosphorus (being nitrate free) allows you to dose phosphorus according to the needs of your plants without the risk of overdosing nitrates. When used as directed, Seachem Flourish Phosphorus will enhance and accelerate the growth of aquatic plants without enhancing algae growth. For maximum benefit, use with Seachem Flourish Nitrogen & Seachem Flourish Potassium. Seachem Flourish Phosphorus is safe for invertebrates such as shrimp.

Guaranteed Analysis

Available Phosphate (P2O5) 0.3%

Soluble Potash (K2O) 0.2%
