Seachem Aquarium Polisher 250ml

Availability: 4

Price: R170.00

Short Description
Safe for Glass and Acrylic. Ammonia-Free. Protects Against Water Spots. Removes Mineral Deposits.

Description
Seachem Aquarium Polisher is a multi-surface polisher for use on the exterior of glass or acrylic aquariums as well as other surfaces. Seachem Aquarium Polisher does not contain ammonia and is perfect for safe use on and around aquariums or terrariums. Aquarium Polisher easily removes mineral deposits and water spots and helps protect surfaces from dust, salt, minerals and finger print.

Shake well before use. Lightly pour small amounts of Seachem Aquarium Polisher onto a cleaning cloth and wipe aquarium glass or other external surfaces clean. Repeat as necessary. For best results, use a lint free cloth. For wood finishes, use on an inconspicuous test area first to insure no reaction with stains or sealants on the wood. Though Aquarium Polisher is safe for aquariums and terrariums do not use directly in aquarium or terrarium waters.
