

Dragon Betta Red & Blue (Male)

Call for Price: 011 826 5887

Description

The Dragon Betta Red & Blue (Male) is a bold and captivating variety of Betta splendens, known for its thick metallic scales and intense, contrasting red and blue coloration. Best kept solo. Regular water changes and monitoring of ammonia levels are essential for health.

Feed a varied, high-protein diet including betta pellets, frozen bloodworms, daphnia, and brine shrimp. Enhance colour and immunity by adding supplements like garlic guard or Azoo Discus Vitamins. Avoid overfeeding—small, frequent meals are best. Although they can tolerate slightly cooler water, a heater is recommended—especially during colder seasons—for consistent health and vitality.
