Bio Elite Anti Ich 250ml

Availability: 10

Price: R359.00

Short Description
Size: 250ml

Description
Bio-Elite Anti Ich is formulated as a treatment for white spot and is made using natural ingredients. Over-dosage is virtually impossible, and fish should be treated in the main tank, to prevent reinfection.

Bio Elite Anti Ich is completely safe to use with plants, shrimp, stingrays, coral, marine aquariums, Clown Loaches, Hifin Pangauis & any other sensitive animals.

Key Benefits:

*Treats white spot also known as ich

*Kills parasites

*Treatment can be used in the tank/pond

*Over-dosage is virtually impossible

*Relieves skin irritation

*Retards bleeding

*Increases cellular repair

*Boosts the immune system

*Does not affect the nitrifying bacteria

*Contains no harmful chemicals

Use:

*Treatment of "Ich" (Whitespot)

*Parasitic infestations

*Introducing new fish to a tank

Bio-Elite Anti Ich contains Aloe Ferox and herbal extracts that are antiparasitic and antibacterial.

The infected fish should be treated in the main tank as the "Ich" parasite as a portion of its life cycle on the fish and a portion in the water. Treatment is required for 10-14 days as the life cycle of the parasite is of this duration.

For a successful treatment monitoring your temperature is very important. For tropical tanks a temperature of 30°C will result in success.
