

Dymax CO2 DC Regulator RX-123

Price: R2,100.00

Description

Dymax CO2 Professional Regulator

The Dymax CO2 Professional Regulator RX-123 provides accurate regulation of CO2 for the aquarium. The regulator is made of solid aluminium, providing corrosion resistance against salt water. Besides being light in weight, the regulator requires no tools for fastening onto the cylinder. The included solenoid combined with the bubble counter will enable you to provide a measured and timely injection of CO2 into your fish tank.

Ideal for aquarists seeking a reliable and efficient CO2 regulation system, the Dymax RX-123 combines functionality with durability to support vibrant aquatic plant growth and overall tank health.
