Description
The GMO Tiger Barb is a vibrant, genetically modified version of the classic Tiger Barb (Puntigrus tetrazona), bioengineered for dazzling fluorescent colors. These eye-catching fish are perfect for aquarists looking to add a unique and modern twist to their tanks.

-Scientific Name:Puntigrus tetrazona (GMO variant)

-Common Names:GMO Tiger Barb, Fluorescent Tiger Barb

-Omnivorous:Accepts flakes, pellets, live, and frozen foods

-Favourites:Brine shrimp and bloodworms

Based on the traditional Tiger Barb, originally from Southeast Asia (Indonesia, Sumatra, Borneo); GMO variants are selectively bred in controlled environments.
