Description
The Odessa Barb (Pethia padamya) is a striking freshwater fish known for its vibrant red stripe and shimmering silver-black body. Peaceful yet energetic, Odessa Barbs are an excellent choice for compatible aquariums. Males display intense coloration, especially during breeding season, while females have a subtler, more silvery appearance.

-Scientific Name:Pethia padamya

-Common Names:Odessa Barb, Scarlet Barb

-Omnivorous: Will eat high-quality flakes, micro pellets, and live/frozen foods

-Favourites:Daphnia, brine shrimp and bloodworms

Originally discovered in Myanmar (Burma), now widely captive bred for the aquarium hobby.
