Description
The Golden Barb (Barbodes semifasciolatus var.) is a bright and hardy fish that makes a beautiful addition to any freshwater aquarium. Known for its golden-yellow coloration the Golden Barb thrives in compatible tanks and making it ideal for both beginner and experienced aquarists.

-Scientific Name:Barbodes semifasciolatus var.

-Common Names:Golden Barb, Schuberti Barb

-Omnivorous: Accepts flakes, granules, and live/frozen foods

-Favorites:Daphnia, brine shrimp and bloodworms

The Golden Barb is a captive-bred color variation of the Chinese Barb, originally native to rivers and streams in Southeast Asia including parts of Vietnam and southern China.
