

Ocean Nutrition Formula One Marine Pellets

Small 200g

Price: R499.00

Description

A perfectly soft and moist pellet packed in nitrogen-flushed foil bags for maximum freshness. The main characteristics are increased palatability and easy digestion. Contains garlic to improve disease resistance, krill for color enhancement, fresh seafood, plankton, and Spirulina. This food is intended for carnivorous and omnivorous fish.

Formula One is red and, like our frozen and flake products, it is produced with higher protein levels. Do not feed more than can be eaten within 2 to 3 minutes. The foil pouch keeps oxygen out for maximum freshness. Once the inner foil bag is opened, keep the lid tightly shut.

- Soft and moist highly palatable pellets. Small (+/- 1.2mm).
- Contains garlic and Spirulina.
- Super colour-enhancing qualities.
- High levels of refined quality marine proteins.
- Oxidation is limited by the nitrogen flushing method.
