

Ocean Nutrition Shrimp Wafers 15g

Price: R197.00

Description

Ocean Nutrition Shrimp Wafers are specially designed sinking discs ideal for shrimp such as Caridina and Neocaridina species, including cherry, bee, crystal, and blue bolt shrimp. These +/- 2.3mm wafers are appropriately sized and come with a convenient mini-spoon for easy and accurate feeding.

Formulated by aquaculture biologists, these wafers provide a complete diet rich in essential vitamins, minerals, and proteins required for optimal growth, strong exoskeletons, and healthy molting. A high content of Spirulina enhances natural coloration and vitality.

Unlike flakes or pellets, the dense texture of the wafers ensures they sink quickly, reducing surface competition and giving bottom-dwelling shrimp uninterrupted access. They remain stable in water for over 24 hours without dissolving or clouding the aquarium, ensuring minimal waste and a cleaner environment.

- Ideal for all Neocaridina & Caridina shrimp species.
- Freshwater herbivorous invertebrates.
- Nutritionally complete with essential vitamins and minerals.
- High Spirulina content for vibrant color enhancement.

- Long-lasting in water, does not cloud or pollute
- Easy-to-use with included mini feeding spoon
