

Azoo Plus Bio XD Extreme Decomposer 250ml

Price: R295.00

Description

BIO XD (Extreme Decomposer)

BIO XD (Extreme Decomposer) is a Premium biological conditioner for aquariums.

Works for both freshwater and saltwater.

Restores water quality and recreates a natural environment.

It is the fastest biological degrader on the market, working in 8 hours.

Reduces the cleaning frequency of your aquarium.

Contains multiple highly active bacterial strains such as Paracoccus denitrificans & Desulfurobacterium.

Inhibits algae growth.

AZOO Plus BIO XD (Extreme Decomposer) is a Premium Biological conditioner that restores the natural quality of water by replicating a healthy environment in your aquarium.

“The fastest nitrifying power in the world”

Water conditioner for the biological degradation of organic compounds in decomposition for freshwater and saltwater. It decomposes excreta and sediments in 8 hours, reducing cleaning frequency. It is composed of multiple strains of highly active natural bacteria.

BIO XD bacteria can quickly block the nutrient source of annoying algae and effectively inhibit the growth of all algae.

These bacteria can be immediately inoculated into both freshwater and saltwater

aquariums, to rapidly decompose all types of contaminants such as impurities, food residues, and excrement. The powerful nitrifying bacteria work to break down most of the bothersome contaminants in just 8 hours, keeping the water clean for longer and significantly reducing the cleaning frequency.

AZOO Plus BIO XD (Extreme Decomposer) belongs to the AZOO Plus line of conditioners by the AZOO brand.

BIO XD is composed of multiple strains of natural and highly active bacteria, such as nitrifying bacteria, *Paracoccus denitrificans*, and *Desulfurobacterium*, at a concentration exceeding 109 CFU/g.
