Price: R295.00

Description

Azoo Plus Algae Away is the immediate solution to eliminate your algae infestation.

For freshwater aquariums, planted & ponds. (Not designed for Marine Aquariums).

Resolves the problem of algae proliferation.

It is effective against the prevention of suspended unicellular algae.

If used prudently & correctly, it does not harm aquatic plants.

Do Not Overdose.

Keep your tank as dark as possible throughout the treatment period.

Algae Away belongs to the AZOO Plus line of conditioners by the AZOO brand.

Resolves the problem of algae proliferation caused by an imbalance in the nutrients of your aquarium (NO2, NO3, PO4, SiO4) without harming the organisms in your aquarium.

Eliminates and prevents the growth of algae such as filamentous algae, “brush” algae, brown algae, blue-green algae, black algae, among others. Harmless to plants, fish and

nitrifying bacteria. It can be applied in different hardnesses of water without side effects on your condition.

It is harmless to fish and aquatic plants and is suitable for aquariums and natural ponds. It is highly recommended to use this product cautiously with certain aquatic plants and other organisms sensitive to heavy metals.

Make a 1/3 water change and dose once a day for 15 days. Shake the product well and add 5 ml per 100 liters of water to the water outlet of the filter or pump. The filamentous alga will be removed approx. 7 days, The alga “brush” or brush 15 days approx. Remove algae before they break down in the aquarium.

MAINTENANCE

Dosing once a week will effectively prevent the growth of algae. Once used, close the lid tightly and keep the product in a cool place out of direct sunlight.
