

# Blue Full Moon White Rim Betta

**Call for Price:** 011 826 5887

## Description

The Blue Full Moon White Rim Betta is a true showstopper. With its deep metallic blue body and bold white edging along its large, flowing full-moon tail and fins, this betta makes a striking centrepiece in any aquarium.

They prefer warm, clean water. Although they can tolerate cooler conditions, consistent heating—especially during South Africa's colder months—will ensure a healthier and happier fish.

Feed a varied diet of high-quality betta pellets, frozen or live bloodworms, daphnia, and brine shrimp. For optimal health and colour enhancement, occasional supplements like Garlic Guard and Azoo Discus Vitamins are highly recommended.
