Description
The Galaxy Plakat Half-Moon Betta is a compact yet striking Betta splendens variant, prized for its cosmic, multi-colour pattern resembling a galaxy of stars across its body. With a short-finned plakat build and a broad half-moon tail spread, this betta is perfect for enthusiasts looking for beauty and agility in one fish. Best kept solo.

Feed a high-protein diet of quality betta pellets, frozen or live foods like bloodworms and brine shrimp. Occasional daphnia boosts digestion. Enhance colour and immunity with garlic guard or Azoo Discus vitamins.

While they can survive without heaters, maintaining consistent warmth—especially during South African winters—is vital for their health and activity.
