Resun LP-100 100w

Availability: 2

Price: R3,400.00

Description
The Resun Air Pump LP100 quietly delivers a maximum high volume air output of 140 litre per minute, which is suitable for large fish and koi ponds.

It should be housed in a low dust environment.

Must be set-up above the water level.

- Voltage/Wattage: 240V / 100W

- Must be set-up above the water level

Provides a high air output with great efficiency for helping the oxygenation of the water.

Widely Used in Fish Farms, Ponds, Aquariums, and Industries For Oxygenation.

NOTE - Ensure that one uses a Non Return Value to prevent the back flow of water to the air pump

Only place the pump outside the water in a dry environment, not in the water.

Adding oxygen or aeration into a fish pond /fish tank is very important for fish health, particularly in densely stocked fish ponds and in the summer months when oxygen levels

decline. Fish will become visibly more active in an oxygen-rich pond.
