

ADA Aquasky RGB 60 (C plug)

Call for Price: 011 826 5887

Description

AQUASKY RGB is an LED lighting system designed for 60cm (L) aquarium tanks. With the use of high-luminosity white LED light with an enhanced colour spectrum, AQUASKY RGB can brightly illuminate the aquarium at less power consumption and makes the color of aquatic plants look more vivid. Its slim lighting unit features excellent heat dissipation. When installed on the stand, AQUASKY RGB naturally blends in with surroundings and gives an open atmosphere above the aquarium.
