Price: R260.00

Description
OCEAN NUTRITION BETTA SPA INDIAN ALMOND LEAVE EXTRACT

Enhance your Betta's habitat with Indian Almond Leaf Extract. Promotes health, mimics nature, and binds ammonia for cleaner water.

Available for the first time for the Betta hobbyist in a user-friendly format: wild almond leaf, and a lot more, in one easy formula. Clean, easy, complete, and consistent. The wild almond leaf extract mimics the natural conditions of the Betta fish. Contains Yucca extract to bind ammonia (NH3) in the water. Contains Calcium to activate the muscles and to develop strong bones, teeth, and scales. Produced only with natural ingredients.

Recommended doses: 5ml per 8l of water for normal applications. Use with every water change. In case of severe stress, and symptoms the concentration can be doubled.

- The leaves contain humic acids and tannins and are known to have antibacterial properties.

- Ideal for conditioning the Betta, promotes spawning, activity, and colors. Betta SPA is recommended for all fish kept in small containers, especially during transportation.

- Lowers the pH of the water and neutralizes harmful chemicals. Adds essential trace

elements to the water.

- Colors the water via natural tannins, lignins and fulvic acids.

- Will make bubble nests stickier.
