

Seachem Spiral Bubble Counting Diffuser

Price: R606.00

Description

For aquariums up to 75 L-190 L. Large surface area of diffuser disc ideal for high volumes of CO₂ gas. Built in bubble counter makes the use of a separate bubble counter unnecessary. Simple and easy to use.

The Spiral Bubble Counting Diffuser is a pollen style CO₂ diffuser that connects to CO₂ injection systems to easily disperse CO₂ gas into the planted aquarium. The built-in spiral bubble counter allows for easy monitoring of the rate of CO₂ injection. The inclusion of a bubble counter in the diffuser makes the use of a bubble counter on the CO₂ tank or in-line unnecessary.

Compatible with - Standard Airline Tubing. Suction cup included.
