Juwel Eccoflow 500

Availability: 2

Price: R1,079.00

Description
Juwel Eccoflow 500

JUWEL Eccoflow pumps are the latest generation of highly-efficient, silent circulation pumps. They stand out from the crowd due to their excellent operating quietness and low power input.

JUWEL Eccoflow pumps are the latest generation of JUWEL flow pumps. In all Eccoflow pumps, the impellers are on a double bearing system and are specially tailored to the individual motor rating. This is what creates the extra operating quietness and low power input of the Eccoflow pumps. If you use the ceramic axles, which are available separately, JUWEL Eccoflow pumps are also perfect for use in saltwater aquariums.

The bypass flow principle means that the impeller chamber is constantly and automatically cleaned. As you would expect, the JUWEL Eccoflow pumps comply with the highest safety standards and are VDE certified.

Pump Power - 500 L/H

Energy Consumption - 5.5 W

Cable Length - 238cm
