

AC Aqua Clean Bio Filter Medium 1L

Price: R179.00

Description

Optimum surface area: The AC Bio Filter Medium contains abundant nano and micro pores that provide an optimal surface area. This feature facilitates the intensive colonization of nitrifying bacteria.

The hollow cavities within the filter medium create a hypoxic or anaerobic environment, which accelerates the growth and reproduction of anaerobic nitrifying bacteria.

The high concentration of nitrifying bacteria enables a more efficient reduction of peak ammonia and nitrite loads.

The GH (general hardness) and pH of the AC Bio Filter Medium are neutral, and compatible with various water conditions.

The AC Bio Filter Medium slowly dissolves a variety of trace elements. This promotes the metabolism of fish and shrimp, contributing to their overall well-being.

Patented hollow design, provides deep anaerobic zones for denitrification .

Guarantee free from harmful substances.

For long term ammonia, nitrite, and nitrate management and removal.

Washable and reusable.

Can be used in:

Used in canister filters.

Used in sumps.

Used in trickle or shower filters.

Used in hang on back filters.

Please rinse the products with tank water several times before use.

1 x AquaClean Bio Filter Medium 1L Only

(Net bag not included)
