Price: R770.00

Description

Keep your small aquarium at the perfect temperature with the Hygger Nano Heater 20W – HG142. Designed for nano tanks and small aquariums, this compact yet powerful heater provides precise and consistent heating to create a stable environment for your fish and aquatic plants. Its ultra-slim profile allows it to fit easily in tight spaces without disturbing your aquascape.

With its fully submersible design, the Hygger Nano Heater is easy to install and discreet in your tank. The built-in thermostat ensures reliable temperature regulation, making it a safe and efficient choice for beginners and experienced aquarists alike.

20W heater ideal for nano tanks and small aquariums 3L to 19L.

Compact, fully submersible design for easy installation.

Built-in thermostat for accurate temperature control.

Provides a stable and safe environment for fish and plants.

The Hygger Nano Heater 20W is the perfect solution for maintaining optimal water conditions in smaller aquariums. Whether you’re keeping bettas, shrimp, or other nano fish, this heater ensures comfort and stability, helping your aquatic pets thrive.
