Description
Aqua Master Koi Food Growth 10kg Large

Enhanced Growth and Beauty Formulation

Aqua Master Koi Food Growth is expertly crafted to promote not only the growth of your Koi but also to develop a beautifully contoured body shape. This specialized formula is perfect for aquarists who aim to enhance both the health and aesthetic appeal of their Koi.

-Balanced Nutrient Combination:This Koi food features a well-balanced mix of amino acids, saccharides, and fats. These essential ingredients are critical for developing the characteristic beautiful body of a Koi, ensuring they grow both in size and in grace.

-Enriched Nucleotide for Immunity: The inclusion of enriched nucleotide in this formula plays a vital role in enhancing the immune system of your Koi. A robust immune system is crucial for maintaining the overall health and well-being of your fish.

-Digestibility and Water Quality: Designed for easy digestion, this Koi food reduces the risk of water contamination. Its digestible nature ensures that your fish absorb more nutrients, producing less waste and contributing to cleaner water in your pond or aquarium.

-Rapid Growth Support: The formula is enriched with calcium (Ca) and phosphorus (P),

key minerals that support strong and effective growth in Koi. These elements are essential for the development of a sturdy skeletal structure and overall robust physique.

-Enhanced Palatability: Amino acids and small peptides are incorporated to increase the food's palatability. This entices Koi to eat with enthusiasm, ensuring they receive the full benefits of their diet.

-Probiotics for Clean Water: The addition of probiotics not only aids in digestion but also plays a part in reducing water pollution. This leads to a cleaner and healthier aquatic environment, which is beneficial for both the fish and the aquarist.

Aqua Master Large pellets for Growth are ideal for medium to larger sized Koi (>25cm)
