ADA La Plata Sand 2kg

Availability: 1

Price: R395.00

Description

ADA La Plata Sand is a premium, natural cosmetic substrate designed to elevate the aesthetic appeal of your aquascape. With its fine, light-colored grains, La Plata Sand brings a clean and natural look to any aquarium layout, enhancing both the visual depth and contrast of your planted or minimalist setups.

Sourced and manufactured by Aqua Design Amano (ADA), this substrate is 100% safe for aquatic life. It contains no artificial additives or dyes, making it ideal for use with sensitive fish species, shrimp, and live plants.

Whether you're creating an Iwagumi-style layout, a nature aquarium, or simply adding detail to your scape, ADA La Plata Sand blends seamlessly with other substrates and hardscapes like stones and driftwood. Its fine texture also makes it perfect for foreground or cosmetic layering without affecting water chemistry.

- Natural, fine-grain cosmetic sand

- Bright color enhances aquascaping layouts

- Ideal for foregrounds or decorative layering

- Safe for all freshwater fish, shrimp, and plants

- Doesn’t affect pH or water hardness

- Weight: 2kg
